

2003 State Small Business Profile: PENNSYLVANIA

In 2002-2003, gross domestic product continued to rise nationwide, while growth in employment remained slow to recover. Small businesses continued to be a source of economic strength nationally and in Pennsylvania. Research from the Office of Advocacy shows that half of U.S. private non-farm output and employment stem from small firms with 500 or fewer employees. Women and minority entrepreneurs are also significant participants in the state's economy. Advocacy uses a variety of data bases to document the contributions of small, minority-, and women-owned businesses in Pennsylvania.

Number of Businesses. The number of employer businesses in 2002 increased by 1.2 percent and numbered 268,723. The number of self-employed individuals decreased an estimated 7.6 percent in 2002. In the state, 98.4 percent of the businesses were small (with fewer than 500 employees based on 2000 firm size data) (Source: U.S. Dept. of Labor, Employment and Training Administration; U.S. Dept. of Commerce, Census Bureau; U.S. Dept. of Labor, Bureau of Labor Statistics).

Women-Owned Businesses. In 2002, self-employed women totaled 118,093, or 31.5 percent of self-employed workers in the state (Source: U.S. Dept. of Labor, Bureau of Labor Statistics). Women-owned businesses totaled 203,000, of which 15.7 percent had employees. They generated \$34.0 billion in revenues in 1997 (Source: U.S. Dept. of Labor, Bureau of Labor Statistics; U.S. Dept. of Commerce, Census Bureau).

Minority-Owned Businesses. Minority-owned businesses represented 5.9 percent of the state's businesses and generated \$8.6 billion in revenues in 1997. Of these minority-owned businesses, 23.2 percent had employees (Source: U.S. Dept. of Commerce, Census Bureau).

Business Turnover. Between 2001 and 2002, new employer firms decreased 4.7 percent to 31,939. Business bankruptcies decreased by 18.0 percent, and totaled 1,263 in 2002. Business terminations increased by 7.3 percent, and totaled 35,859 in 2002 (Source: U.S. Dept. of Labor, Employment and Training Administration; Administrative Office of the U.S. Courts; U.S. Dept. of Commerce, Census Bureau).

Employment. In 2000, businesses with fewer than 500 workers employed 50.2 percent of the state's 5,087,237 non-farm sector employees (see Table 1). The industry with the most small business employees was manufacturing. Between 1999 and 2000, small businesses added a net total of 97,932 employees; they represented 94 percent of net non-farm employment change in the state (see Table 2) (U.S. Dept. of Commerce, Census Bureau, Statistics of U.S. Businesses).

Small Business Income. Non-farm proprietors' income—a partial measure of small business income—increased by 3.9 percent in 2002 and amounted to \$34.6 billion (Source: U.S. Dept. of Commerce).

Finance. Small businesses traditionally depend on local bank services and use commercial bank lenders. The number of banks in the state has decreased. The largest concentration of banks by asset size was in the \$100 million to \$500 million category. A list of small-business-friendly banks in the state has been published by the Office of Advocacy in its banking studies and is available on the website at www.sba.gov/advo/stats/lending. (See Table 3 for the number of banks by asset size.) Small businesses seeking loans should also consider lenders that participate in the SBA's preferred or certified loan programs; for a list of these lenders, call the Small Business Answer Desk at (800) 827-5722.

To obtain more information about the Office of Advocacy's data, research reports, and analyses of small business, go to: www.sba.gov/advo/stats or call (202) 205-6530. Special thanks to Ryan Miller, Advocacy intern, for his work drafting this report along with Victoria Williams.
