Comments:

The U.S. Nuclear Regulatory Commission (NRC) continues to support agency mission goals and objectives to regulate commercial and institutional uses of nuclear materials through Federal contracting. The NRC also continues to support our Nation's small businesses, including those small businesses owned by the disadvantaged, women, veterans, service-disabled veterans and companies located in Historically Underutilized Business Zones (HUBZone). The NRC is committed to increasing its efforts to achieve Federal small business goals and objectives, and supports varied Federal, Congressional, State and local government efforts and initiatives to maximize small business prime and subcontract opportunities. The NRC continues to deliver a viable outreach program to train, assist and explore the small business marketplace. The NRC recognizes that small businesses are the economic engine that drive job growth and are vital to the economic recovery and security of the Nation. The NRC also values future small business partnerships in supporting agency operations to ensure that our agency benefits from a flexible, competitive and innovative supplier base.

While the NRC did fall slightly short in meeting its overall small business prime contracting goal, the agency is pleased to report that contract dollars awarded to small businesses increased, including to businesses owned by the disadvantaged, women, and companies located in HUBZones. The NRC continues to support and implement a Scorecard Progress Plan to increase the value of prime and subcontract awards to small business through strategic acquisition planning, market research and set-aside efforts as well as by providing training and technical assistance to both Federal agency officials and the business community. Moreover, as the agency implements various strategic acquisition and operational modernization initiatives, the NRC plans to continue ensuring a place for small businesses in its consolidation efforts.
